

Global Chemical Company refines its Logistics & Trade Compliance (LTC) Processes

CHALLENGES

- Logistics and Global Trade Compliance modules has been minimally implemented leaving several opportunities to provide better service, cost control, and recognize efficiencies.
- High percentage of processes are manual and system inefficiencies causing loss of cost savings / usability challenges.
- User adaptability is low due to manual processes with a lot of scope for productivity improvements.

SOLUTIONS

Transform Transportation Management (SAP TM), Global Trade (SAP GTS), Warehouse Management (SAP EWM) and Environment Health and Safety (SAP EHS) spaces through series of projects, grouped and prioritized, to recognize functionality improvements and productivity.

- **SAP Transportation Management (TM)** : Shipment Planning, Order Change Management, Freight Settlement, Automation, Carrier Connectivity, Reporting, Visibility, User Experience, Strategic Freight Procurement, etc.,
- **SAP Global Trade Services (GTS)** : Sanction Party List screening/reporting, AES customs filing improvements, optimizing TM-GTS integrations, preference certificate generation, activating import filing for multiple geographies, virtual imports for sales scenarios, etc.,
- **SAP Extended Warehouse Management (EWM)**: EWM RF capability with queues, Automated movements, Batch split, Physical Inventory, new facility, consolidated packing, etc.,
- **SAP Environment Health Safety (EHS)**: Substance Management, Substance Volume Tracking, Report Shipping, Report Management, WWI Servers, Dangerous Goods, Global Label Management and SDS sheet on Fiori App,

BENEFITS

- Better business service level to our customer
- Better freight forecasting and more accurate accruals
- Automated communication with suppliers
- Track and trace shipment visibility
- Cycle time reductions
- Hard savings due to automation and visibility improvement to inefficient processes
- More accurate Freight Settlement and quicker payment resolution
- Denied party reporting, sanction party release notification - more transparency in the global trade area
- More integrated transportation/global trade processes (carriers/brokers etc.,)
- Manage compliance information centrally and satisfy legal and customer requirements
- Streamline component and product classification and automate safety data sheet and label creation
